

## Stag Class

Our learning theme for this half term is...

### Ocean Exploration

Our focus will be on the oceans of the world and the impact that we have on it. We will also study explorers from the past including Darwin's journey aboard the HMS Beagle. Many of our subjects will be accessed through this theme. Some subjects, such as maths, will continue to be taught separately.

In English, we will be reading the book Darwin's Dragons by Lindsay Galvin. The book follows the adventures of a young boy working alongside Darwin on the ship. We will use this book to study forms of text including diary writing and narrative, as well as using it to debate and share opinions.

In Maths, we are starting the term by learning about ratio. Then our focus will move on to look at Algebra and decimals. This half term we will also do some more SATs practise papers which I will be able to discuss with you during Parents Evening.

In Geography, we will be studying the oceans of the world. We will learn about various habitats and areas within the ocean, the marine wildlife that live there, and the way that humans use the oceans. A large part of our focus will be on how human beings have affected and changed the oceans, and if these changes are reversible.

## Links to Prior Learning

We will be reviewing our previous scientific knowledge of humans and genetics, then relating this to Darwin's Theory of Evolution.

In our Geography lessons we will be calling back on learning from previous years about the oceans, habitats and pollution.

## Reminders:

Please ensure your child brings their reading book and journal to school each day as there will be opportunities most days to read or add to their journals.

**PE will be on Tuesdays and Fridays.** On Tuesdays we will be doing gymnastics and on Friday we will be doing orienteering and outdoor adventurous activities.

As part of our healthy eating approach, we do not allow squash or flavoured water in school, so please ensure your child has only water in their bottle. If your child would like a snack at break times, we ask that you send them to school with fresh fruit or vegetables to promote a healthy diet.

Our focus in Art will be on lino printing. We will be looking at work by a local artist named Sybil Andrews, then having a go at creating our own prints in her style.

In Science, our focus will be on Inheritance and Evolution. We will look at the how animals have adapted over time and how inheritance works.

On Thursday mornings each week Mrs Slingsby will be working with the class teaching RE, PSHE and Music.

## Homework

Your child will continue to be sent home with tasks in their maths and English homework books this term. Please take the time to check the work with them and supervise this. The answers to the questions are in the back of the books so if you would like to take the time to mark this with your child it can really help their understanding of the work. Please encourage your child to continue reading as often as possible and to keep practising times tables so that they remain fluent with them.

If you have any questions or concerns, please feel free to come and speak with me. Thank you in advance for your support.

Mr Cocks

## Dates for your diary:

NSPCC Number Day – 7<sup>th</sup> February

Safer Internet Day – 11<sup>th</sup> February

Parents Evenings – 12<sup>th</sup> & 13<sup>th</sup> February
